

Date: 28 July 2017 Time: 23:55 hrs  
Subject: CHIEF MEDICAL OFFICER DECISION NO: 1 Document No: 7.2  
From: The Chief Medical Officer  
To: The competitor of car No. 1 M-Sport World Rally Team  
Crew: Sebastien OGIER / Julien INGRASSIA

Julien Ingrassia got hard lateral impact when his car drove off the road. The right rear end of the car hit hard to a tree. Because of headache, nausea and vomiting, he was transported to the Central Hospital of Central Finland. He underwent a trauma CT and medical examination. He has been diagnosed mild concussion. There were no findings in the CT. He was discharged from the hospital and there was assigned a new medical examination for him in the evening by the CMO and the FIA Medical Delegate.

CMO Dr. Timo Kaukonen and FIA Medical Delegate Dr. Jean Duby examined him again in the evening. He had improved a little bit but he was not recovered completely. He also has pain in the left abdomen area.

He still suffered symptoms of the mild concussion and therefore it is not safe that he continues competing tomorrow. Therefore, I decide, in consultation of the FIA Medical Delegate, that he should have 15 days of rest from competitive driving and after that he can participate to competitions without any medical examination.

Timo Kaukonen  
CMO  
Neste Rally Finland

Jean Duby  
Permanent Medical Delegate WRC  
FIA
